

SANDRINI
metalli

COMPANY PROFILE

ABOUT US

Sandrini Metalli was founded by Nazareno Sandrini in the 1950s and has become a leader in the market of corrugated and trapezoidal sheets.

What started out as a small company has become an industrial leader with the focus on providing the highest quality products and the best customer service.

Following its mission to develop new technological systems of corrugated and trapezoidal sheets, Sandrini Metalli has expanded its activities into 3 different branches:

- **Building Division**, which is dedicated to the production of corrugated and trapezoidal sheets for all kinds of use;
- **Coils Division**, which is dedicated to the supply of strips and sheets in several materials, thicknesses and widths, with a wide range of colours available;
- **Architecture Division**, which is dedicated to roofing and cladding to enhance buildings with high architectural value.

Sandrini Metalli is a responsive, reliable, competitive and technologically advanced partner for all companies dealing with products and services for roofing systems.

Our history, **values** and **numbers**

OUR HISTORY

70 YEARS OF EXPERIENCE

ORIGINS

Sandrini Vittorio, together with his brother Nazareno, the future founder of Sandrini Metalli, starts a small craft business in Piamborno (BS), focused on flashing activities and metal carpentry.

1950

FOUNDATION

The brothers founded OLLS (Officina Lavorazioni Lamiera Sandrini) SNC, a new company dedicated to metal sheet processing, which constitutes the basis of the existing Sandrini Metalli.

1973

BUILDING

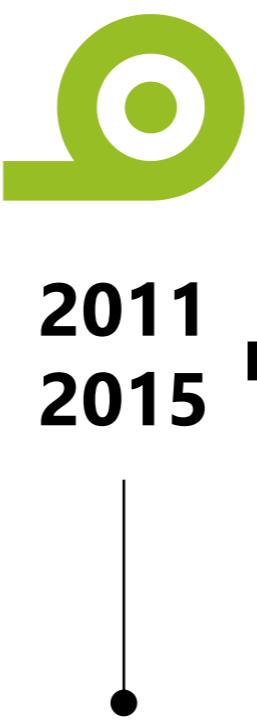

Together with his daughter Lorenza and her husband Pierfranco Damioli, Nazareno establishes the current main headquarters of Sandrini Metalli in Costa Volpino (BG). The development of the Building Division leads the company to achieve the market leadership.

2001

COILS

During this period, the third generation - Alberto, Nazzareno e Federica - joins the company and a new operating subsidiary in Pian Camuno (BS) is acquired to develop the Coils Division. This new branch is dedicated to the supply and processing of coils and stips.

2011
2015

ARCHITECTURE

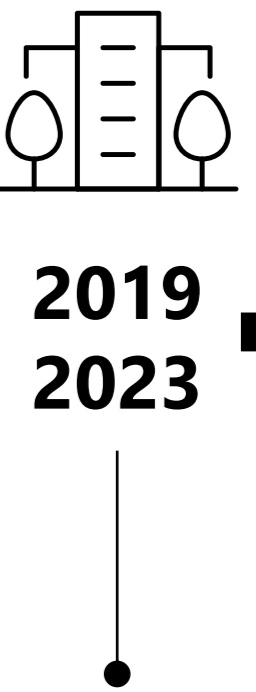

Sandrini Metalli business grows further, and a new operating subsidiary is acquired in Chiari (BS), where the Architecture Division is set up to enhance and strengthen the market presence with high architectural value products.

2017
2019

TODAY

Today, Sandrini Metalli carries out the activities among 4 locations, can count on more than 140 employees, and a widespread sales network. Thanks to its knowledge gained over more than 70 years' experience, it is the expert, reliable and ideal partner for every project.

SUSTAINABILITY

THE PRINCIPLES WHICH INSPIRE OUR GROWTH

GOVERNANCE

We share corporate values and the culture of sustainability inside and outside the company structure, promoting research and innovation for social and economic progress.

ENVIRONMENT

We protect the environment by using renewable energy and by monitoring and improving the impact of our products on it, increasing the use of recyclable materials and reducing the amount of waste produced.

PEOPLE

We carefully research and train our collaborators to offer the customer the best possible experience. We motivate and educate our team in the respect of everyone's rights, inclusiveness and well-being.

CORRUGATED AND TRAPEZOIDAL SHEETS

Sandrini Metalli can be considered a market leader in the production of corrugated and trapezoidal sheets due to a complete range of **28 several corrugated and trapezoidal sheets** for roofing, cladding, structural floors, large span floors and composite floor systems.

A wide assortment of products with different thicknesses, materials, colours and finishing available on stock.

Specific customized products obtained through the **bending process** of the corrugated sheets.

An anti-condensation system available through the application of SANDnodrip (anti-condensation felt) or SANDcontrol (anti-condensation and anti-noise felt).

A wide series of **accessories** is also available to complete the system. All corrugated and trapezoidal sheets are CE certified products and can guarantee great parameters in terms of resistance, load and lightness.

DIVISIONE **COILS**

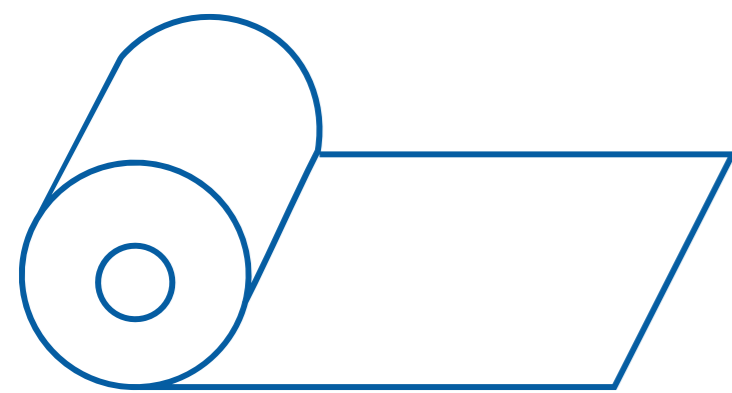

COILS

Due to the use of slitters and cut-to length machines of latest generation we are able to offer various straps, sheets and strips with a wide availability of materials:

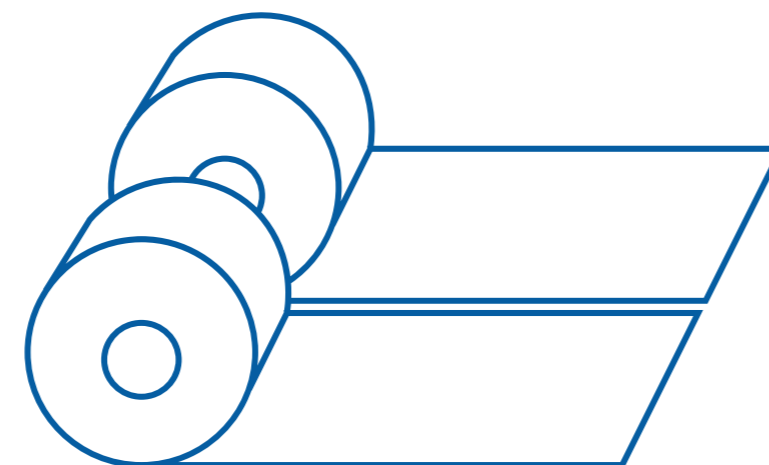

- Aluminium (mill finish and pre-painted);
- Steel (galvanized and pre-painted);
- Stainless steel;
- Aluzinc®;
- Magnelis®;
- Copper and Titanium zinc.

Also a various thicknesses is available: from 0.4 mm to 2 mm.

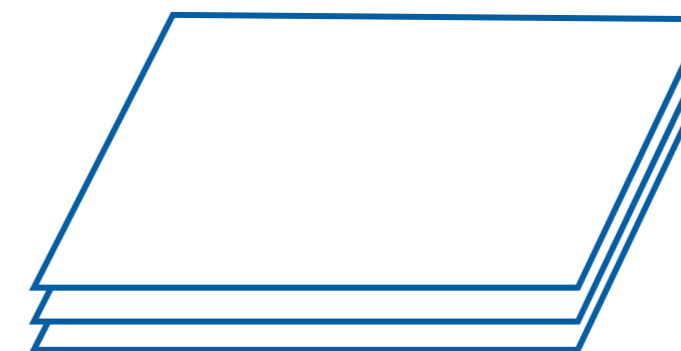

Standard widths, such as 1000 mm, 1250 mm and 1500 mm are available and can be cut in narrow stabs according to client needs. Sandrini Metalli can guarantee prompt deliveries thanks to the wide assortment of materials and colours on stock.

ARCHITECTURAL SOLUTIONS

The extensive experience acquired in the sheet metal and roofing sectors inspired Sandrini Metalli to embark on a new challenge in 2019: the launch of a **new range of products for the architectural world** with long-term warranties and great certified performances.

The new branch Architecture Division is set up to enhance buildings with high architectural value. Prestigious aesthetics combine with excellent performance in engineered systems to satisfy every customer need.

ROOFING

SOLUTIONS FOR ROOFING

The solutions for roofing differ from the traditional vast offer of corrugated and trapezoidal sheets.

The innovative standing seam roofing system designed by Sandrini Metalli "SANDfuture" is specifically conceived for low-slope roofing, it can easily be integrated with fall protection systems and photovoltaic panels.

The prestigious aesthetic value, great walkability performance and fast installation system are only some of its main features.

Soft and sinuous shapes

DIAMONDS

PRODUCTS

Diamonds is the first exclusive profile of SANDcustom service, dedicated to the creation of fully customizable metal profiles for facades with high architectural value. Created by the expertise of our collaborators, Diamonds is a unique sheets, whose facets create precious reflections that give dynamism and character to the cladding. The lines, marked and elegant at the same time, put the emphasis to the building shapes giving an aura of luminous refinement, while the alternation of flat and angular surfaces creates a three-dimensional effect capable of giving the covering depth and dynamism. The profile becomes a representation of the union between light and matter, between heaven and earth, between abstraction and concreteness.

ROOTS

PRODUCTS

Roots is the second profile of SANDcustom service. Viola, a member of the Sandrini Metalli team and creator of this profile, takes inspiration from its origins and memories during her childhood in San Pantaleo, the picturesque village in Sardinia where she was born, and her experience on lake, please where she grew up. Roots is above all a tribute to the origins, that give stability in everyone's life, anchoring without binding, being as a safe haven in the depths of memory. The profile's shapes show the wind breeze, the rock roughness, the wave crests, they are the symbol of the connection between human being and nature, which the inevitable flowing of the time transforms without affecting its soul.
